1.0 Introduction

1.1 Purpose of this document

This is the weekly summary progress report for group 16. This document describes the tasks that are currently being undertaken by members of the group and our progress towards completing them. This week we focused on the completion of the first deliverable.

1.2 Scope

This document summarises the progress of the group as a whole. It does not describe in detail the work and participation of individual group members.

1.3 Objectives

The main objective of this document is to summarise the progress of the group so that it can be reviewed and then used to evaluate whether or not we are on schedule. It will also help identify where improvements can be made and whether or not members need to be added or removed from certain tasks.

2.0 Project Summary Report

Since the last group project tutorial the group has continued to work on the final design for the system. The deliverable was broken down into sections and then assigned to members within the group. We also looked to improve the sections we wrote for the first design document based on the feedback we were given. We've arranged a review meeting for next week to ensure that everything is going to plan before we submit the work.
